Korea's Premier Online University A Highly Respected and Accredited University

Daegu Cyber University is a highly respected and accredited online university, offering career-track bachelor's degrees. We provide a challenging education and our online curriculum allows you to study when and where it's most convenient.

Earn your degree from an accredited university that allows you to interact with faculty and other students as you learn.

Daegu Cyber University,
President **Rhee Kun Yong**

Here you will find an extremely accessible university

where students can learn at home without attending school,
where students can study at anytime and anywhere, and
where students can study on the Internet even at the ends of the earth.
This is the very essence of Daegu Cyber University.

Here you will find a very kindhearted university

which is based on the principles of love, devotion, and voluntary service,
where the faculty and staff are harmonious with students, and
where students are friendly with each other.
This is the very essence of Daegu Cyber University.

Here you will find a highly praiseworthy university

which is famous for special education, social welfare, and related therapies,
which cares for the children with special needs and social minority, and
which is leading globalization despite its geographic disadvantage.
This is the very essence of Daegu Cyber University.

This is why Daegu Cyber University stands out from other online universities.

Daegu Cyber University strives to spread the spirits of love and devotion all over the world.

Welcome to Daegu Cyber University!

The University will enable you to realize your dream.

The University will enable you to lead the information age with knowledge-driven culture.

President
Daegu Cyber University

DCU's history of constant change and challenge helped foster its reputation as a provider of premium and first-rate education.

Educational Ideals

- Extensive camera facilities that produce professional-grade output
- Multi Viewer system

Editing and Encoding

- Fully Verified Tapeless Editing System
- Large Storage Devices
- Broadband Encoding System
- Multi-Function MAC Editing System

Daegu Cyber University Academic Departments

Department of Special Education

The ONLY online university in Korea to offer courses in Special Education

- Today's society gives increased attention and support to education including education for children with special needs. These increases have led to a higher demand for education experts in this field.

DCU's Department of Special Education prepares students for licensure as special education teachers with expert knowledge to teach learners with special needs.

Department of Art Therapy

The FIRST university among all 4-year universities in Korea to offer courses in Art Therapy

- We live in an era that has seen dramatic changes in recent years -- an era that is rapidly evolving.

Industrialization, globalization, technology, and social competition -- these are just some of the issues shaping today's world. Most of these issues - both good and bad -- do not recognize national borders. They affect us directly and are dramatically altering the way in which we think and operate. Many people fail to adapt to this fast changing world and encounter severe problems like poverty, depression, suicide, domestic disputes, identity crises, social isolation, and underachievement in school.

DCU's Department of Art Therapy teaches students how to prevent, relieve, and treat the pain that an individual experiences by focusing knowledge, therapeutic techniques, and theories in art therapy. With this purpose, we produce art therapists who possess the practical and proficient knowledge needed in their career field.

Department of Speech Language Pathology

The ONLY online university in Korea to offer courses in Speech Language Pathology

- Individuals with communication disorders often face difficulties in expressing their thoughts through the signs and symbols of their linguistic system and in turn, may face difficulties in communicating and forming relationships with others.

DCU's Department of Speech Language Pathology aims to prepare students for licensure as Speech-Language Pathologists who will make individualized patient-centered decisions by correctly identifying the language disorders of children and adults. We maximize students' academic efficiency by providing both online (theoretical) and offline (practical) classes.

Department of Behavior Therapy

The FIRST university in Korea to offer courses in Behavior Therapy

- People can experience anxiety and stress or display improper behavior due to today's fast changing society and culture.

DCU's Department of Behavior Therapy analyzes the behavior of those people who cannot adapt to society through a scientific, logical, and ecological approach and identifies the function of the behavior those people have shown in order to help maximize their value.

We nurture behavior therapists who help people with behavioral issues to overcome the psychological and pathological pain they experience and make them accepted as a member of society.

Department of Play Therapy

The ONLY online university in Korea to offer courses in Play Therapy

- DCU's Department of Play Therapy prepares students to become play therapy specialists who help children and adolescents with emotional and/or behavioral challenges cope with their life challenges.

This controversial issue in today's society is no longer just the concern of individuals, it is the concern of all society. As the prevalence of emotional and/or behavior challenges in children and adolescents increases, society requires experts in the field and professional support systems.

The Department of Play Therapy has been collaborating with many international associations in related fields in order to provide an effective curriculum for its students by applying both ecological and psychological approaches to the study of play therapy.

Department of Counseling Psychology

Professional Counselors with practical skills

- Life can be a continual process of problem solving. Individual try to survive from the competition and be at their best to maximize their abilities. Counseling is a study that helps solve the problems encountered by today's humans and guide them to maturity and self-realization. Counseling Psychology is a specialty area within the discipline of psychology. In counseling psychology, psychological knowledge is applied to the practice of professional counseling to better understand the people and familiarizes students with the use of various approaches, scientific thought, and principles as applied to the practice of counseling and/or counseling therapy. Counseling is considered not only as a science but also as an art which means that counselors require special creativity and self-training.

DCU's Department of Counseling Psychology has built a program that will familiarize students with the different counseling techniques to be applied to the different social segmentation including children, husbands and wives, and families. Students will become professional counselors who are needed in the field through a combination of course curriculum and participation in various workshops.

Department of Social Welfare

Social Workers dedicated to love and devotion

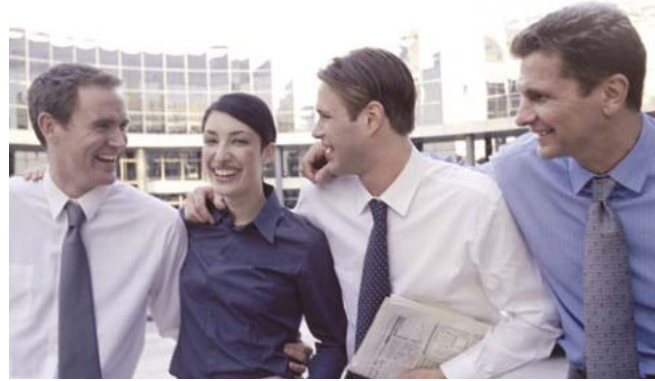

- DCU's Department of Social Welfare has established the following objectives as today's society faces many social welfare problems and increased demand on welfare services.

- To establish a value system for social welfare to solve issues of human suffering
- To develop a knowledge system for problem solving issues of social welfare
- To develop applicable strategies to practical issues facing social welfare

The Department of Social Welfare studies administration and policies on Social Welfare and knowledge and techniques on its practice to nurture highly qualified social welfare experts with practical and theoretical skills.

Department of Rehabilitation and Social Welfare

Rehabilitation Specialists

There is a growing need for experts in the field of rehabilitation and social welfare in preparation for increasing demand on rehabilitation due to an aging society and increasing number of handicapped persons.

DCU's Department of Rehabilitation and Social Welfare prepares students to become rehabilitation specialists who help the aged, the handicapped, or others in need of rehabilitation to be adopted into society. We also prepare Vocational Rehabilitation Specialists who assist handicapped persons to maximize their career ability so that they can contribute as an active member of society.

Department of Welfare Public Administration

Welfare Public Administration Specialists

Come to the Department of Welfare Public Administration at DCU if you dream of becoming a Social Worker, Legal Administrator, or Criminal Psychologist!

DCU's Department of Welfare Public Administration prepares students to become social welfare experts by developing practical skills and building research ability to scientifically study electronic government in the information age as a Social Worker, Legal Administrator, and/or Criminal Psychologist.

- Online education of Welfare Public Administration frees learning from the constraints of time and space
- Provides practical education on Welfare Public Administration to students through online education
- Self-development training for employees in institutions related to Social Welfare and its administration
- Provides education to government educational institutions or social work institutions
- Provides information services related to administration or legal issues

Department of Community Development

Lifelong Education Specialists,
NGO Specialists

DCU's Department of Community Development prepares students to become Community Development Specialists, Lifelong Education Specialists, NGO Leaders, or Global Community Development Specialists. Many societies around the world are beginning to emphasize community development in which local community citizens are centered under local governments. Therefore, Community Development Specialists will be needed in the future to identify and analyze problems occurring in local communities.

Department of Computer and Management Administration

Practical Business Services Specialists

Today's society is truly a rapidly changing information society and the core technologies that access this information society are computers and Information Technology. In addition, business management is a social sciences discipline that is designed for students interested in the study of effective and strategic corporate management.

IT and Business Management were originally considered as different studies and were taught in different disciplines; however that perception is now changing.

Computer software programmers are also required to do financing, marketing, or planning at work and there is an increasing need for a work force capable of solving business problems using IT techniques.

DCU's Department of Computer and Management Administration prepares students to become experts in the field of IT and Management.
